An Aſtrologo-Phyſicial Diſcourſe.

THat the pre-dominion of humours, is the immediate cauſe of diſeaſes; and that the excitation of theſe humors, is cauſed by the various and different Aſpects and Poſitions of the Stars is even by Hippocrates *and* Galen *themſelves confirmed. Truſt we then to theſe Rules Aſtrological, to be obſerved for the advantage for the ſick;*

Let the { Sanguine, Cholerick, Phlegmatick, Melancholy } *bleed the* ☽ *being in* { ♈, or ♊. ♋, or ♌. ♎, or ♐. ♑, ♒, or ♓. }

But let her be alſo in the Aſpect of the Fortunate Planets, and ſeated in a fortunate part of Heaven.

It is good to purge with Electuaries, when the ☽ *is in* ♋; *with Pills, when ſhe is in* ♓; *with Potions, when in* ♍, *becauſe then poſited as before directed.*

Vomits are unſafe for all ſorts of complexions and conſtitutions; yet ſometimes there is a neceſſity for them; as when the Diſtemper lyeth above the ſtomach; it being impoſſible for a Purge, or any purgative Medicine thence to carry it; but when there is an occaſion they may be ſafely taken when the ☽ *is in* ♉, ♏, *or* ♐ *in any good Aſpect of* ♀, ♃, *or* ☉.

Glyſters are moſt conveniently adminiſtred, when the ☽ *is in* ♈, ♒, *or* ♏, *poſited as before.*

Good to ſtop Fluxes, or Rheumes, or Iſſues, when the ☽ *is in any of the Earthly Signs, viz.* ♉, ♏; *or* ♍; *of which experience is a valuable witneſs.*

Very proper to Bath, when the ☽ *is in* ♋, ♎, ♒, *or* ♓, *in Aſpect of* ♀, *or* ♃.

Convenient to cut Hair, the ☽ *being in* ♎, ♐, ♒, *or* ♓, *increaſing in Light. And although this be in the opinion of many but a Trivial thing to obſerve; yet were it more taken notice of by the Gallants of our times, they need not diſguiſe themſelves with* Venus *Locks; But they, it may be, eſteem it an Honour to be made amends with a part of her, that Originally injured them.*

Medicina a medico; medela ab altiſſimo.

An

TRIGGE 1684.

Of the Eclipſes which happen in this Year.

FOur times will the Inhabitants of this Earthly Globe be deprived of the Light of the Sun and Moon in this year 1684. *Viz.* Twice of each.

The firſt will be a Solar Eclipſe upon the ſixth day of *January*, about five of the Clock at Night, Celebrated in twenty ſix degrees of Capricorn. It will be a very great Eclipſe, *Viz.* Eleven digits of the Sun's body will be Obſcured: But it will be inviſible to us in *England*, becauſe the Sun (with us) will be ſet below the weſtern Horizon. It will be about the *Meridian* in *Jamaica*, *Barbadoes*, and all the *Lee-ward Iſlands*, and of great import to them.

The ſecond will be an Eclipſe of the *Moon*, on *June* the ſeventeenth, about three of the Clock in the Morning, in ſix degrees of *Capricorn*, and viſible not only to us in *England*, but to all *Europe*, if the Air be clear; It will be but a ſmall Eclipſe, yet worthy Obſervation, even for the ſake of the Longitude, which many boaſt a perfection of, but few there be that know it.

The third will be a great Eclipſe of the Sun in twenty two degrees of *Cancer*, on the ſecond day of *July*, about our three a Clock in the Afternoon. It will be a moſt remarkable Eclipſe (*Argol* makes it Total) and about two thirds, or more, of the Sun's body will be Obſcured from our Sight. The Eclipſe will appear in this Shape.

It begins in the 9th. Angle, a place repreſenting Religion, and ends in the 8th. Angle of the Heavens, a place repreſenting Death. Its a Tropical Eclipſe, and celebrated in a Sign that is in time to the Turks Horoſcope, God keep Chriſtians at unity among themſelves, as well in Faith as Manners.

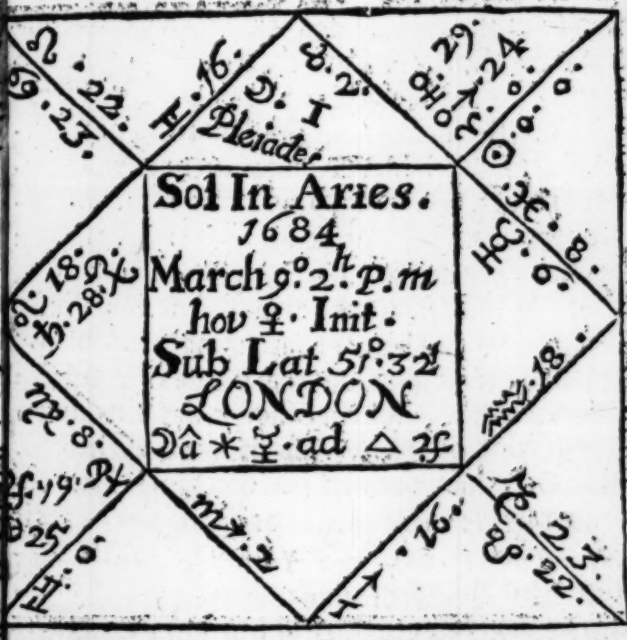
The Fourth will be an Eclipse of the Moon on *December*, the Eleventh day, at 11. of the Clock at Night. It is Celebrated in one degree of *Cancer*, & will be a great Eclipse, almost Total, and visible to us in *England*. It will be much such another Eclipse as that was on *February* the 11 day in the year, 1681. (or rather 1682. according to Astronomers) which the Learned Mr. *John Butler B. D.* hath so aptly taken Notice of, in his Sermon, Entituled, Gods Judgements upon Regicides. *pag.* 13. thereof.

☞ Besides these Eclipses, there will be Celebrated in this year, a famous Conjunction of *Saturn* and *Mars*, upon the third day of *October*, in 13 degrees of the Celestial Virgin. It portends a fear of more *Fanatique* Witchcraft to be practised in these Countreys, and by those Persons subject to the second decade of *Virgo*. As the Spleen and Gall in humane Bodyes, warring against each other, beget all *Hypocondriacal Distempers*, and all the effects of *Melancholy*, *Madness*, *&c.* So will this Conjunction of the two Haughty Rebels of Heaven, Distemper whole Nations, Kingdoms and Countreys with their poisonous Influences. God bless us in these Nations from any more Plots, Conspiracies, or accursed Associations. — *Virgo* hath some Relation to Religious matters, as well as *Pisces*, (though, I must tell you, not so much) and this Malevolent *Synod* being Celebrated therein, may create or stir up many Enthusiasts or Madmen, who under pretence of Piety, will be apt to inflame the Government, and disturb those that give them Protection. Such Ungratefull wretches are they, whether Zealots or Athists, that thus requite their Protectors and Benefactors.

I must now hasten to consider of the Four Seasons of the year, 1684.

1. Of the Spring Quarter.

THe Spring, the moſt delightful Seaſon of the year, commeth alwayes when the Sun, the Royal Lamp of Heaven enters the Celeſtial Sign *Aries*, the firſt and Chief Sign of the Zodiack, at which time all things begin to look freſh, and flouriſh; The ſtrength of Men, as well as the year, is then renewed: Day and Night being of Equal Length, now at this time; As the Night looſeth her Regency, the days encreaſe, and ſhew a happy Reſurrection of all things growing upon the Earth. This delightful Quarter begin-neth this year, on *March* the ninth day, at two hours *P. M.* after Afternoon, and the Heavens are then thus Poſited.



Much difference we know there is among Aſtronomers concerning the Sun his Entrance into *Aries*, every little Enthuſiaſt magnifying his own Opinion; (for there are Hereticks in Aſtronomy and Aſtrology,) as well as in Divinity.) But where the Univerſal conſent meets, there it is moſt likely for

for us to meet with the Truth; And becauſe *Kepler*, *Bullialdus*, *Wright*, *Wing*, *Shackerly*, *&c.* do nearly accord to this Figure we preſent you with, it is moſt likely to be true; and therefore to be preferred before the pretended Rectification of any Supercilious Innovator whatſoever, that ſhall differ verymuch from this our time given which nearly chimes to all the beſt and moſt worthy Aſtronomers in the world. I do not pretend to affirm or maintain it to be exactly and punctually the truth. Pray, who dares do ſo by any Figure of Heaven whatſoever.—But if it be near to the Truth it is ſufficiently ſerviceable to our purpoſe and deſign.--And, if we find this year of 1684. to be Laden with a Melancholy, and Mens minds diſturbant and unquiet; alſo with ſome Epidemical Sickneſs Reigning, and like *Saturn* Lord of the 6th. Retrograde in the Aſcendant; And if we ſhall perceive the People, generally, to be of an Elated, Ambitious, Obſtinate, Contradictory, and peeviſh Genius, rather diſobedient then Dutiful to their Superiours, Envying, not only their Magiſtrates and Governours, but one another alſo; like to the exalted Moon, Lady of the 12th. in the *Medium Cœli*: Or, if many and tedious Law ſuits are promoted, and furiouſly driven on to ruine one another, or that young Men (following Surfeiting and wantonneſs) contract Diſeaſes and die apace, *Viz.* more then is uſual in other years like unto Mercury in Oppoſition of *Jupiter*, who is Lord of the 5th. and 8th. Angles: Or, if Men and their wives Quarrel and ſeparate, or women ſtrive to Domineer or Lord it over their Husbands, or endeavour to betray them upon the Account of Religion, or that they make uſe of any other Hypocritical Acts or devices, either by appealing to Doctors Commons, or the Court of Chancery, *&c.* to prejudice or deſtroy

destroy one another; like unto that fiery, Chollerique, hot-headed Conjunction of *Mars* and *Venus* in *Aries* in the ninth Angle.—— If, I say, that all of these, or the most of these things happen, then we may conclude that this our Vernal Figure is near unto the Truth, And that is all we contend for. And so we are arrived at—

2. *The Summer Quarter*

THe Æstival or Summer-Quarter alwayes begins, where the Vernal, or Spring Quarter ends; Royal *Phœbus* then Mounting his *Apogæon* Chair of Honour, is removed to his greatest distance from the Earth, making to us, in these Northern Countreys, Largest Portion of Sun-shine, and least quantity of shadow: or which is all one, the longest days, and shortest Nights among us on this side of the Equator Line.

This curious Season beginneth this year in the *Meridian* of *London* (*Englands Metropolis*) upon the tenth day of *June*, about a Quarter after four of the Clock in the Afternoon, the Sun then first making his entrance into the Tropical Sign of *Cancer*: and it continueth all the time he is transiting through the three Signs of *Cancer*, *Leo*, *Virgo*. If you would be informed of the true Philosophical and Cabalistical meaning and significations of all the four Seasons of the year, pray please to have Recourse unto my *Calendarium Astrologicum* for the year 1681. where you will find them all very plainly Expressed. And thus much shall suffice for the Summer Quarter.

3. *Of the Autumnal Quarter*

THe Autumnal Season, or Harvest Quarter, is the third Quarter of the year Astrological, it being the

he declining Equinox, as the Spring is the Inclining or advancing One. These are alwayes in Diametrical Opposition one to the other: Like *Æsop's* Buckets, as he one mounts upwards, the other still proportionably goes downwards

The Days and Nights are now again become equal, all the world over, (under the Poles excepted, and we never heard of any people that ever inhabited those Points) and the Sun doth equally irradiate both the Hemispheares as he did in the Spring. But, alas! This Equality of Light is but for a very little time; For from the moment of the Sun's touching this *Equinox*, the Dayes grow shorter and shorter, and the Nights increase in Length.

This Season ever begins where the Summer Quarter ends, *Viz.* when the Sun toucheth the first Scruple of *Libra*, as the Sign of Justice; and continueth all the time he is Transiting thorow the Signs of *Libra*, *Scorpio* and *Sagittarius*. And in this year it happeth upon the 12 day of *September*, at forty minutes past eight of the Clock in the Morning, the latter part of *Libra* then Ascending on the Horoscope. Hence we make our Annual Progress unto ———

4. *The Brumal, or Winter Quarter.*

WHich Brumal or Winter Quarter constantly begins where the Autumnal makes its Period. Which as Astrologers agree, is alwayes when the Sun salutes the first Scruple of *Capricorn*: the Earth being then farthest deflected from the Suns perpendicular rayes, receiving greatest portion of shadow, and the least quantity of the Solar refreshing Beams, and so causeth

cauſeth ſhorteſt Dayes, and longeſt Nights, to all thoſe that dwell or inhabit on this ſide of the Æquator.

Bright *Sol* is now in his *Perigæon*, or neareſt diſtance to the Earth, being now in exact Oppoſition to his *Apogæon* which is *Cancer*, or the Summer Solſtice.

And this year, this Melancholy, Dark, Obſcure and uncomfortable Seaſon, begins on *December* the tenth day, at Eight houres, and near thirty minutes paſt, in the evening. At which time the Celeſtial Lyon Aſcends the Eaſtern Finitor, even as at the Spring Seaſon. The Envious Planet *Saturn* is in the ſecond of the Figure, and *Mars* in the Fourth Angle, there affliting benevolent *Jupiter*. This Quarter continues all the while the Sun is paſſing thorow *Capricorn*, *Aquarius*, *Piſces*, at the end whereof, this year of 1684. Receives its Death and Burial; And the New year of 1685. meets its Birth, and Original. Unto which (and as much farther as the Divine Goodneſs pleaſes) God of his great mercy (through peace and plenty) Bring us for his Holy Names-ſake. Amen.
